

You've seen the nuisance flooding in downtown Annapolis and experienced the resulting traffic jams.

CLIMATE CHANGE IS REAL, AND WE ARE EXPERIENCING THE IMPACTS.

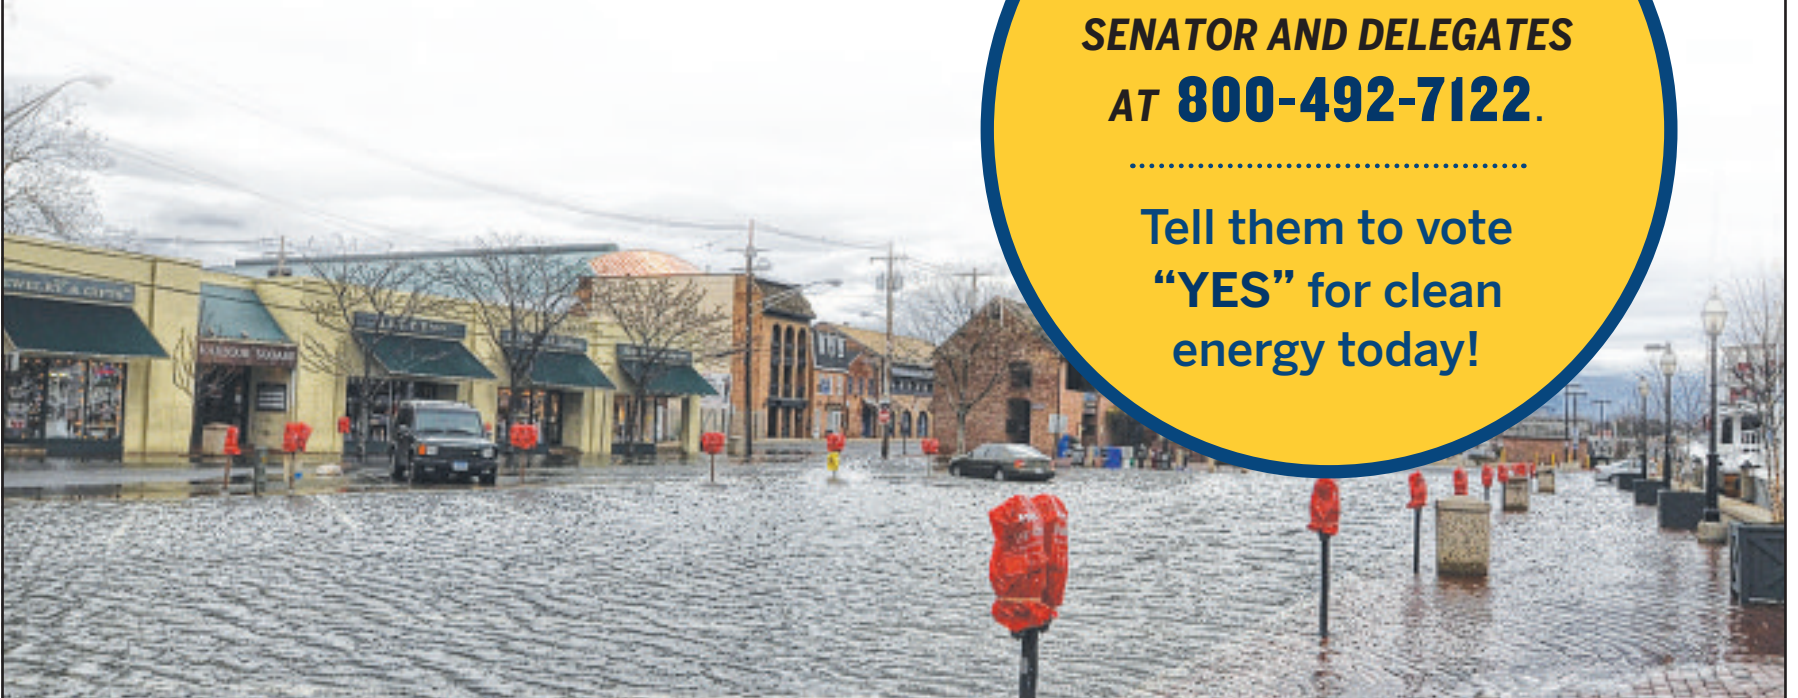

Not only does climate change impact our daily routines and downtown Annapolis businesses, it also impacts the air we breathe and leads to worsened asthma and increased hospitalizations and heart attacks in Maryland. We need to reduce our use of climate-destroying fossil fuels and move to cleaner energy.

The federal government isn't acting, but Maryland can!

The **2019 MARYLAND CLEAN ENERGY JOBS ACT (House Bill 1158/ Senate Bill 516)** will double our state's use of renewable electricity sources like wind and solar by 2030, create 20,000 new quality jobs and see billions of dollars invested in our state.

CALL YOUR ANNE ARUNDEL COUNTY SENATOR AND DELEGATES AT 800-492-7122.

Tell them to vote "YES" for clean energy today!
